HAMATON H57 TPMS TESTER WITH
1 YEAR UPDATES AND
HOTLINE AT ELEKTRO PARTNER.

www.elektropartner.com

H57 Unit with OBDII Module.

Free updates for a whopping five years* and many time-saving features make the H57 a force to be reckoned with.

Quickly configures EU-Pro generations, programs Hybrid NFC/3.5 sensors and reads 100% of OEM sensors.

Can be upgraded to configure/program all popular universal sensors*.

Sync-ID technology: technicians can perform an OBDII relearn in under two minutes on over 90% of vehicles. Just read the sensors, connect the OBDII module, transfer the data and go!

Update wirelessly via WIFI.

Manual ID Entry and Retrieve ID which, respectively, allow users to input sensor IDs or obtain them from the ECU (with an OBDII module). Ideal when the sensor's battery is dead.

The database contains a wealth of vehicle information for five key regions (Europe, Japan, Korea, North America, and Russia).

Frequent software updates come free-of-charge for five years*.

4.3" full-colour display.

Includes OBDII module, charger, ethernet cable and carry case.

*Free updates for five years will cease if you upgrade to All Sensor option.
