Identifikationsmetode
For at kunne bruge vores tjenester, skal du verificere din identitet. Vi bruger tredjepartstjenester, leveret af Authenteq, til at udføre identitetsbekræftelse.
Du skal bruge et kamera og id-dokumenter, så som kørekort eller pas, for at gennemføre identifikationsprocessen.
Vi vil klart anbefale, at du udfører identifikationsprocessen via en mobil enhed, så som en smartphone, da kamera-kvaliteten generelt set er meget højere end på et webcam, hvilket vil få dig meget hurtigere igennem processen.
Følgende er derfor et par valgmuligheder, der vil hjælpe dig med at fortsætte processen på din mobiltelefon i stedet.

Scan QR-koden
Du kan enten scanne QR-koden med din mobiltelefon

Send en e-mail
eller sende en e-mail til (a*)@elektropartner.dk med et link, som du kan åbne på din mobiltelefon
[Send en e-mail](#)

Send sms
eller sende en sms til (+4540*****) med et link, som du kan åbne på din mobiltelefon
[Send sms](#)

[Jeg har ingen mobiltelefon, så lad mig fortsætte på denne enhed...](#)

Follow the instructions on your smartphone.

SOLUTION CONTINUED:

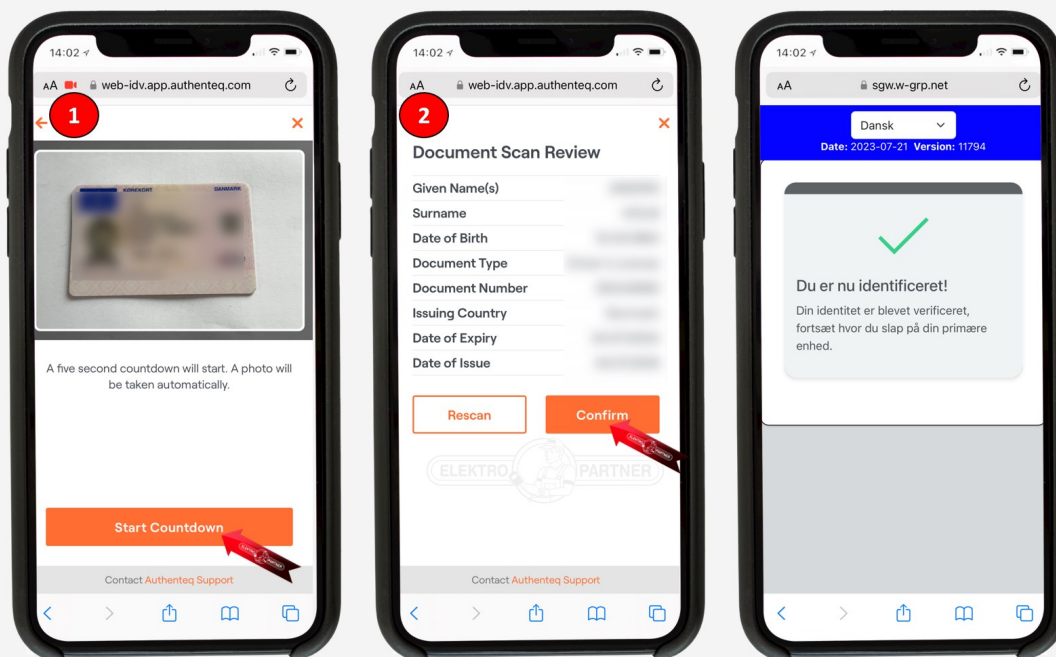

Click the arrows:

1. Position your face inside the marked circle. Press I'm ready and then follow the instructions
2. Select which ID you want to be identified by. Driver's license or passport recommended

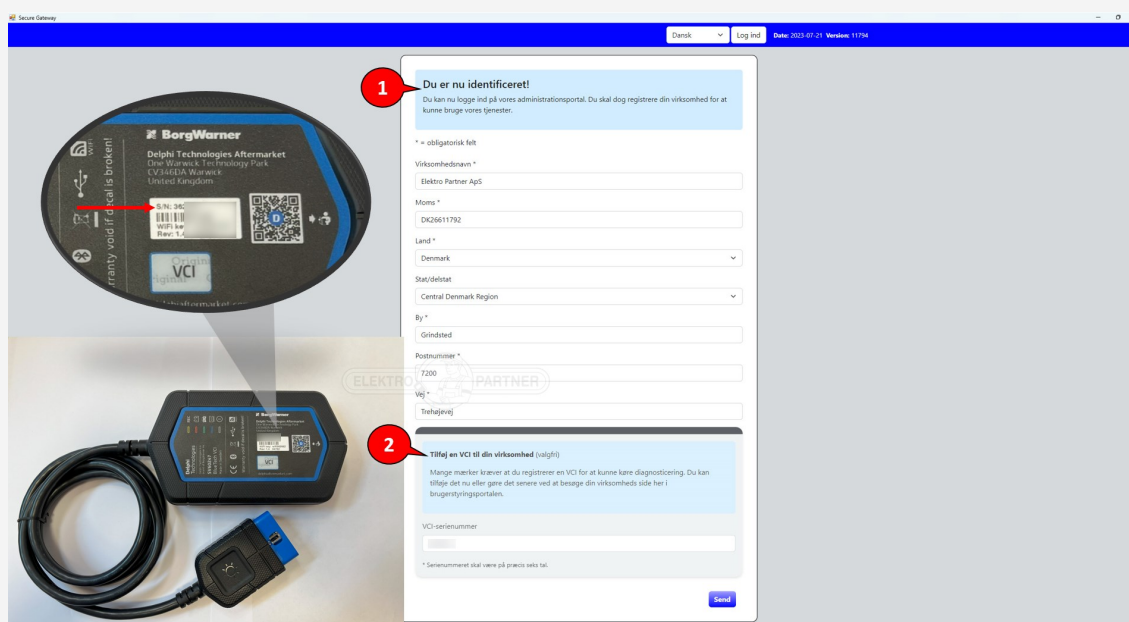

SOLUTION CONTINUED:

1. Hold the camera still over your ID document and press "Start Countdown". After this, the photo is taken after approx. 5 seconds
2. Press Confirm

1. Confirmation that you are identified correctly. Then fill in the fields under point 1
2. Enter VCI serial No. Which you will find on the back of the Delphi DS180

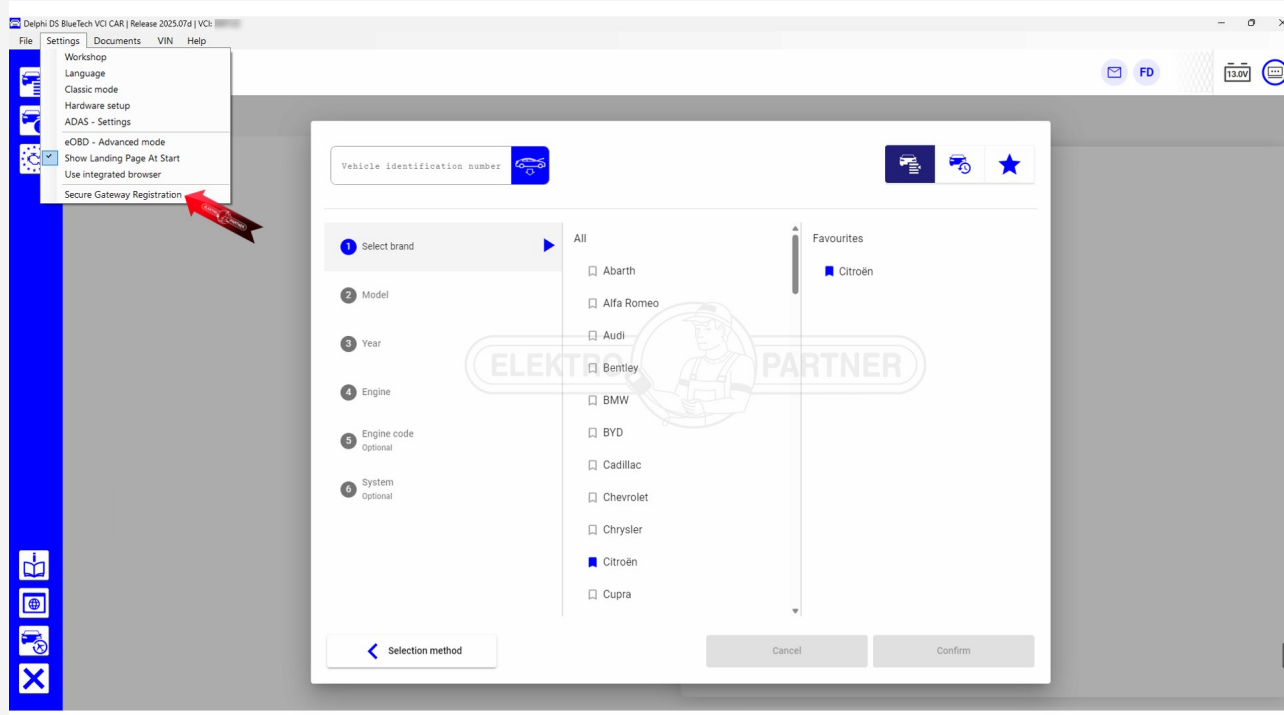

You are now registered correctly.

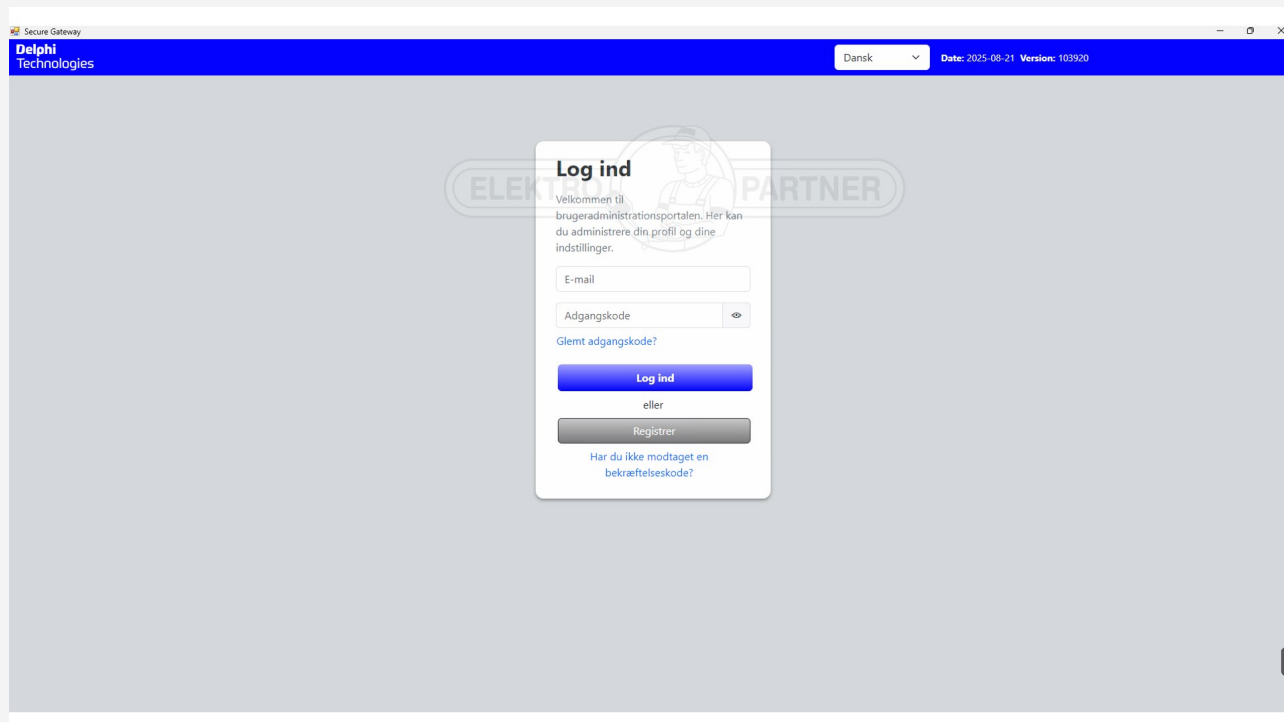

If more than one person needs Security Gateway unlocking, a multi-user account must be created. See guide to this in bulletin No. 10017.

SOLUTION CONTINUED:

Activation of Security Gateway for different car brands:
To log in, press "Settings" and then select "Secure Gateway Registration".

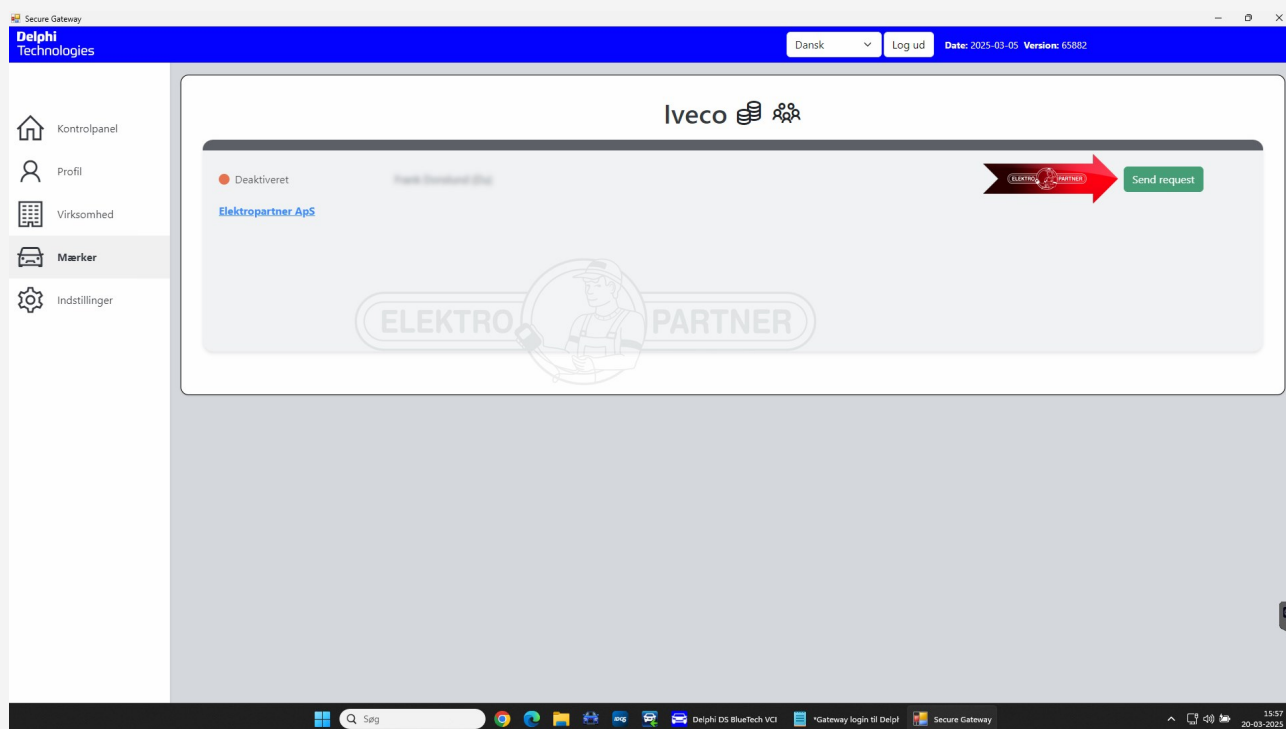

Fill in with email and access code that was previously used.

SOLUTION CONTINUED:

Then select "Brands".**Press "Send request" for each brand.**

Please note: By default, the car brands are included in the Delphi subscription, except for Iveco and Renault, which require an additional subscription. If necessary, contact Elektro Partner regarding this.

SOLUTION CONTINUED:

When the car brand is activated correctly, "Enabled" lights up green.
